IRODS User Meeting 2011

Jargon – Quick Overview

The last user meeting...

# Where is the code?

How do I use this?

How do I maintain this?

Goals...

Make working with iRODS more familiar to mid-tier developers

Patterns and practices

High level public API...easy to use, test, and maintain

Transition

Jargon-core …
New API is beta

iDrop desktop GUI is beta

# Other interfaces and integrations are in development

Jargon-trunk still supported and is being updated...

Jargon-trunk will be refactored in phases, common code pulled out and shared with Jargon-core.

No API or JDK changes are planned for Jargon-trunk, though new functionality will be added.

Jargon-core can be used for new development, tolerating occasional minor API changes.

We need early adopters.
